Wood Pellets

We stock wood pellets for wood pellet stoves!

Talk to Robin today

519-363-3308

- Superior pellet quality
- Medicated with Rumensin or Deccox
- Contains 16% protein
- Easier weaning onto grower ration
- Helps growth weight stability of first calf heifers

Penninsula Creep Ration

Spring is coming and the cattle will be going on to pasture soon. It's time to start thinking about creep feeding your calves.

As our business grows with the demand for feed products the size of our trucks also grows. To make it easier for our trucks and drivers to enter your property and unload product please be sure that trees are trimmed along your driveways and yards.

Thank you!

The Johnson Family and Staff at B&L Farm Services.

Come see us at the Canadian Dairy Expo!

Benefits of Peat Moss Bedding

- Reduces ammonia smell, deters flies from laying eggs, 4 times more absorbent than straw and many more...

CyLence Pour-On Insecticide

B&L Farm Services Ltd. is now pleased to be carrying CyLence Pour-On for Beef and Dairy cattle. For control of Horn Flies and Chewing and/or Sucking Lice on both beef and dairy (including lactating) cattle. CyLence is a ready-to-use solution applied along the top of the head and back of your animal. Treatment for flies can be repeated up to a max of 3 times per year but leaving 3 weeks in between treatments. For optimal lice control, it is recommended to apply a second treatment 3 weeks after the initial treatment. There is a one-day withdrawal for slaughter. It is available in 3 L jug or 500 ml bottle.
