

DAIRY FAT MARKETS

Covid 19 still continues to impact dairy fat supplies due to work force and transportation issues as well as container freight backlogs. Prices for container freight continue to climb and therefore dairy fat prices follow suit. We have done our best to anticipate future demand and have booked several products as they are available to us.

Note that there is a variation in products with some requiring different feeding rates, depending on the cow's requirements. Here is a comparison of RP95 dairy fat vs Silver Prills.

RP95 calculator	g/cow/day
80% C:16	300
95% C:16 RP95	253

Dairy Fat Comparisons	RP95	Other Fat
Price of Dairy Fat in \$/Kg *	\$3.13	\$3.04
C16 per Kg of Dairy Fat	0.95	0.80
Comparative Cost of C16/ Kg	\$3.29	\$3.80
Savings with RP10 \$/Kg	\$0.51	

*based on skid pricing
October 4

	RP95	Other Fat
Kg/cow/day RP95	0.253	0.300
Price per Kg	\$3.13	\$3.04
Cost per cow per day	\$ 0.79	\$ 0.91

We do also carry Energy Booster, Golden Flake (as available) and Megalac. Ask your feed representative which product will work the best for you!

Fall is a great time to trim your trees in laneways and yards. Branches can scratch the sides of our trucks, damage lights or side mirrors.

We appreciate your help in keeping our trucks running smoothly.

There is a substantial price increase coming this fall with AVL Ivermectin. Last chance to get it at this past year's pricing (while supplies last). Call us for a price today on the 5L and 20L jugs.

We also have 3 types of horse wormer paste in stock.

Starting calves with **Smartlic NE-12** helps get them on the right track.

High Mineral Fortification: This supplement is Vitamin and Mineral fortified eliminating the need to feed additional free-choice minerals, resulting in a significant supplemental feed cost savings.

Weather Resistant: The patented, "continuous flow" system creates a quality, low-moisture, exceptionally dense block that maintains its integrity even in precipitation.

OCTOBER SPECIAL

BUY 4 X 220 LB TAKE \$4 OFF

BUY 8 X 220 LB TAKE \$7 OFF

High protein, high bypass protein feed to assist weaning and transportation stress, delivering acids directly to the small intestine. Consistent product, in both pellet and ingredient form. Gives excellent palatability and increase intake. Digestible fibre sources stimulate rumen redevelopment, reduces digestive upset when ramping onto feed. Yeast and Niacin help rumen function during receiving phase.

Available with: Deccox or Rumensin as a Coccidiostat. Chlortetracycline or NeoTerramycin for respiratory stress. Celmax to minimize pathogens in intestines and total digestive tract. Also helps with immunity. (a script may be required depending on medications)

OCTOBER-NOVEMBER SPECIAL

\$20.00 OFF PER METRIC TONNE

(BULK ONLY)

PLEASE NOTE THAT WE ARE NO LONGER A LINDE CANADA INC (PRAXAIR) DISTRIBUTOR. TANK EXCHANGES WILL HAVE TO BE DONE THROUGH THE HANOVER LOCATION.

With rodents wanting to move indoors as the colder weather arrives, here is a reminder that you need a Pesticide Licence to buy most rat poisons and fly sprays. This change happened January 1, 2021. You can get your licence by contacting:
