ATTN Dairy Heifer Customers: We are now stocking (751004) WFS Dairy Heifer (MON) PMX. This is to replace (782810) RIVERSIDE 13-13 HEIFER (RUM) PMX. With the steady rise in feed cost, we are looking to make mineral more affordable for you without compromising nutritional needs. The following is the feeding rate for WFS Dairy Heifer (Mon) Pmx

- 60 g for 6 months of age
- 90 g for 9 months of age
- 120 g or 12 months of age
- 160 g for 18 months of age

If you have any questions please don't hesitate to call your sales rep for more information

B&L Thrive Creep Rtn (Rum)

- 16% protein from all natural sources
- Boosted vitamin E and minerals to avoid deficiencies in fast growing calves
- Multiple sources of bypass protein and highly digestible fibers
- Superior pellet quality for consistent intake
- Made standard with Rumensin
- (Deccox and Plain available upon request)

Starting in May we are taking pre bookings for Creep Feed!

Deferred payment options available

Cleaning and Disinfecting

We have a variety of cleaning and disinfecting products available to us that you can use on your farm to help control bacteria and disease. Below are a few products that customers use and what they do.

Read the label before using any of these products.

Kenosan

This treatment applies to the following species: Chickens, Dairy Cattle, Swine & Turkeys

DEEP PENETRATING, FOAMING ALKALINE DETERGENT FOR ANIMAL FARMS, HATCHERY EQUIPMENT AND VEHICLES.

Keno™san forms a rich, extreme penetrating foam, to remove organic dirt.

Cleans, washes, or prepares the surface for application of a registered disinfectant intended to kill biofilm

Apply at 1 oz / gal - 1 1/2 oz / gal with a foam lance and high pressure (min 600 psi).

Let the product stick for min 20 min and rinse.

Virocid

VIROCID is a highly concentrated and broad spectrum disinfectant for use in the livestock industries. VIROCID is effective against: viruses, bacteria and fungi.

Directions For Use

To disinfect hard non-porous surfaces (livestock equipment, floors, walls, table tops, counter tops), apply a 0.25% (1:400) solution to thoroughly wet surface. Spray the surface and let stand for 10 minutes. VIROCID is a concentrate that can be used with a mop and bucket, trigger sprayers, sponge, or by soaking. Heavily soiled surfaces should be precleaned prior to disinfection. All food contact surfaces must be thoroughly rinsed with potable water after disinfection.

Biosolve

Biosolve® Plus is a powerful alkaline cleaner and degreaser that quickly removes protein, fat and other organic dirt from surfaces on your farm.

BioSentry ATW

BIOSENTRY ATW is an acidified, non-foaming cleaner for washing trays, plastic chick boxes, egg cases and filler flats in automatic tray washers. It is also an excellent acidic rinse and equipment descale. Low foaming, Acidic detergent (descaling), Safe for use on plastic, glass, stainless steel, mild steel, and galvanized metals.

If you have more questions or would like to order any of these products, please call and ask for Matt or email him at matt@blfarm.com
