

Farm Services Ltd

107 1st Ave S Chesley ON 519-363-3308/800-269-2561

With fuel prices rising, B&L Farm Services Ltd. is always looking for ways to be more cost efficient while still delivering quality service. We try to line up loads to back haul product and co-ordinate deliveries to the same areas. We don't want to ever see our customers run out of feed . If you can do your best to give us 2 business days when placing bulk orders and have bag orders in no later than 1pm the day prior to your delivery day, this helps with planning loads for our trucks.

We appreciate your business and want to be able to keep costs down so we can pass that savings on to our customers.

Medication Updates for 2026

As we move through 2026, we have made some updates to the medications included in our feed programs. These changes are part of our ongoing effort to provide high-quality, cost-effective solutions for your operation.

You may notice different product names appearing on your feed prescriptions. In almost all cases, these are alternative brands of the same or more concentrated form of medications you have previously been using. Please be assured that all products selected are of equivalent or improved quality and meet the same performance and safety standards you expect. All necessary prescription updates will be handled by our team, and there will be no cost to you for these changes. If you have any questions or would like to review your program, please don't hesitate to reach out to your B&L representative.

Christine Schoonderwoerd, BSc.

Wallenstein Feed & Supply Ltd.

**With the change from Deccox to Bovatec for the prevention of Cocci, if you see any clinical signs of Cocci, please contact your sales representative.

We stock a variety of feeders. If we don't have it, we can get it!

- Round bale feeders

- Mineral feeders

Give Matt a call to get the feeder right for you and your livestock.

Need to get them water? We have water troughs, and access to a variety of water bowls by Johnson Concrete, Ritchie, Rubber Maid and Behlen Country stock tanks.

We also have water line, connectors and valves to hook up water to your pastures.

Need advice, we are here for you.

CHICK DAYS ARE BACK!

Order early for these delivery dates: May 22, June 12 and August 7

Pasture season is around the corner

THE SMART CHOICE FOR DELIVERING MINERAL & FLY CONTROL!

SmartLic[®] AltoSID[®] is an insect growth regulator (IGR) that passes through the animal and into the manure, where the flies lay their eggs. It breaks the horn fly life cycle by preventing pupae from developing into biting adult flies.

The diagram illustrates the horn fly life cycle: HORNFLY (adult fly) → EGGS/MANURE → LARVAE → PUPA. A cow is shown with a SmartLic applicator on its back, and a red prohibition sign indicates that the product PREVENTS EMERGENCE of adult flies.

B&L Farm Services Ltd has Minlic AltoSID 250 lb in stock (vs competition barrels at 200 –220 lb barrels).

Talk to your sales representative or call us today.

Pasture Mineral

We have a variety of Free-Choice pasture mineral medicated with Bovatec. Looking for added Garlic? Its in the formula...of our "SUMMER" minerals that is. Ask your feed representative or call our office to see what formula we can offer you!

WE DELIVER

It's free delivery on your delivery day when you order:

A minimum 10 bags of feed or \$250.00 worth of hardware, gates, feeders, silage covers etc.

Since we are going to your place, you might as well add that shovel you need,

the bag of pet food, animal health, softener salt or that roll of twine or net wrap.

Bag Truck delivery schedule:

Monday– Shelburne, Orangeville, Grand Valley and area

Tuesday– Cargill, Hanover, Walkerton, Kincardine, Teeswater, Wingham and area

Wednesday– Durham, Dundalk, Mount Forest, Elmira, Fergus and area

Thursday– Chesley, Tara, Port Elgin, Desboro, Bruce Peninsula and area

Friday– Clinton, Hensall, Mitchell, Denfield, Glencoe and area
(2nd and 4th Friday of the month)

We stock Guard Star Fly Tags

If you are needing 200+ tags for this season, please call ahead to place your order.

safe-guard[®]
(fenbendazole)

For deworming on pasture, Safe-guard Premix provides an easy and efficient method. Just mix the required amount with salt or mineral to deliver an effective control for a variety of worms. Ideally, treat animals 4-6 weeks after turnout.

Call us today to put Safe-guard to work for you
